

Unsupervised Learning

- The training data is unlabeled.

Supervised Learning

Semisupervised Learning

- Some algorithms can deal with partially labeled training data, usually a lot of unlabeled data and a little bit of labeled data.

Different Types of Learning

Training Data

**Supervised
Learning**

All Labeled Data

Model

**Semi-
Supervised
Learning**

Some Labeled Data

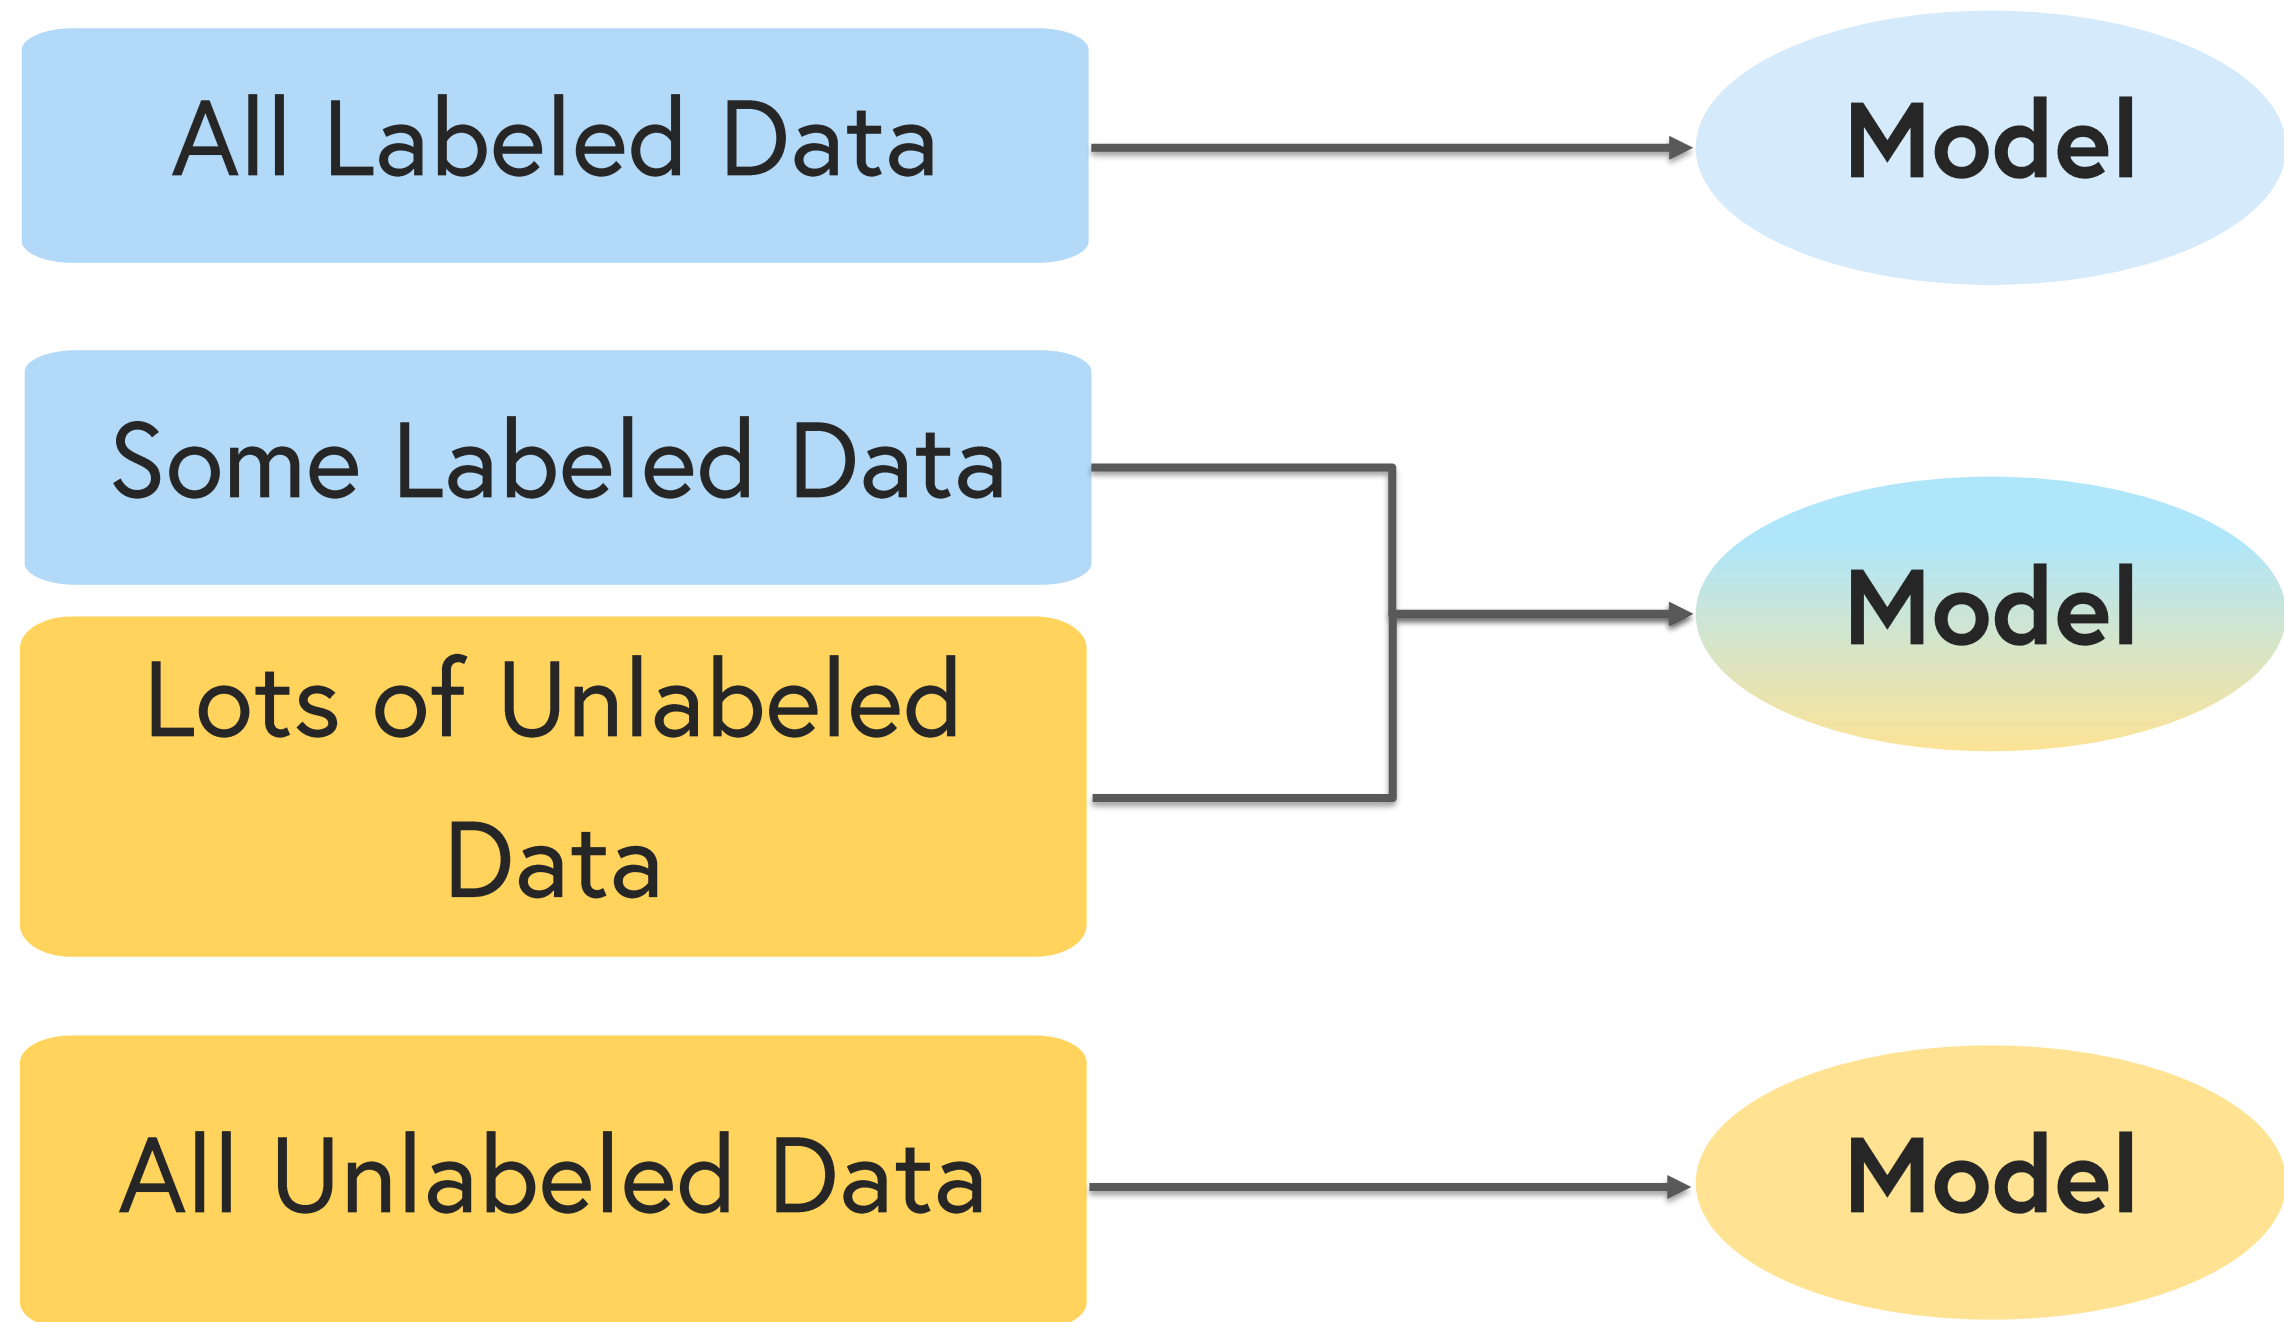

Lots of Unlabeled
Data

All Unlabeled Data

Model

Reinforcement Learning

- The learning system, called an agent in this context, can observe the environment, select and perform actions, and get rewards in return.

Natural Language Processing (NLP)

- A subfield of linguistics, computer science, and artificial intelligence concerned with the interactions between computers and human language.
- Challenges
 - Speech recognition
 - Natural language understanding
 - Natural-language generation

Natural Language Processing (NLP)
